Access Wins \$3.5 Million Port Security Infrastructure Award

Active RFID, Sensors and Scanners Provide Advanced Security for Daily Operations and Fifth Summit of the Americas Conference

DALLAS, TX, February 24, 2009 – [Access International Inc.](#) (OTCBB: AXSI), the leader in Micro-Wireless systems for automated identification, tracking and sensing announced today that it has won a competitive procurement worth \$3.54 million to provide security infrastructure solutions for the [Port](#) at Trinidad's capital, Port-of-Spain. When the contract is finalized, the comprehensive system will include active RFID, multiple types of sensors and multiple types of scanners to improve daily security operations and will augment the security at the Port for modern day threats such as terrorism. In April, Trinidad hosts the [Fifth Summit of the Americas Conference](#) attended by over 30 heads of state of countries from North, Central and South America and the Caribbean.

The specific security solutions remain confidential. However, some of the augmented elements include wireless vehicle and visitor tracking; sensors for toxic chemicals, gases and radiation; and scanning for metal objects on personnel and in baggage. Access provided a [similar solution](#) for [Barbados Port Inc.](#) to improve its security beginning when it hosted the Cricket World Cup Games 2007.

The leaders of the democratic nations of the Hemisphere will meet in 2009 in Port-of-Spain, Trinidad and Tobago at the [Fifth Summit of the Americas](#) to consider the most important issues facing the region and to advance collective solutions in pursuit of a higher quality of life for all citizens. The title of this year's conference is: *Securing Our Citizens' Future by Promoting Human Prosperity, Energy Security and Environmental Sustainability.* The Summit is scheduled to take place April 17-19 at the Port of Port-of-Spain. Thirty four countries are members including the United States.

"Security has long been our primary objective at the Port," commented Chris Mendez, CEO of the [Port Authority of Trinidad & Tobago](#). "These systems are critical to providing the necessary advanced security for the [Summit Conference](#) and for Port operations thereafter."

"Our patented active [RFID technology](#) is proven to leverage existing security resources," said Allan Griebenow, President and CEO of Access International. "Together with other wireless-based detection technologies, our solutions provide comprehensive advanced security threat detection and response. We have specific Port experience in the region and for special, high level events such as the upcoming Summit Conference. We are honored to have been chosen to provide this critical infrastructure security capability."

The solutions being provided represent Access' broader Southern and Eastern Caribbean Security Initiative exemplified earlier by the comprehensive [advanced security system](#) provided to the [Barbados Port Inc.](#) for improved infrastructure security and in support of the 2007 Cricket World Cup Games.

About Access International Inc.

Access International Inc. (OTCBB: AXSI) provides wireless automatic identification and sensing solutions for real-time business activity monitoring. When embedded into vehicle passes, property tags, personnel badges and sensors, its revolutionary and patented Micro-Wireless technology enables automatic local-area wireless data collection and control applications. The systems improve productivity, security and safety and enable personalized education and entertainment. Typical applications include: “hands-free” access control, automatic advanced workforce management, immersive entertainment, workflow management, asset monitoring and distributed sensing. Access is a portfolio company of Amphion Innovations plc (AIM: AMP). For more information on Access, visit www.axcessinc.com.
