## **AXCESS International Teams with GTSI to Bring Its RFID Technology to Critical Government Facilities**

*AXCESS Joins GTSI's InteGuard Alliance; Expands System Integrator Sales Channel*

**Dallas, TX. February 8, 2005** – AXCESS International Inc. (OTCBB: AXSI.OB), today announced it has teamed with GTSI® Corp. to provide its active RFID (radio frequency identification) technology to GTSI's government customers. Additionally, AXCESS has joined GTSI's InteGuard™ Alliance to add its line of products to the physical security solutions the Alliance offers government customers. AXCESS International, a leading provider of RFID solutions for the enhancement of physical security, productivity and protection, provides physical security protection (PSP) solutions via active RFID. Using active RFID for access control, asset and visitor tracking, as well as monitoring and detection of harmful radiation and chemical toxins, greatly improves the safety and security of Americans.

The Alliance was formed by GTSI® in early 2004 to assist in developing open, standard, secure, reliable, and trusted physical security protection system solutions for customers of the Alliance. Today, the InteGuard Alliance has over 60 companies who provide PSP products, services and solutions that offer the best industry-leading physical security and force protection.

"We welcome AXCESS both as a GTSI partner and a valuable member of the InteGuard Alliance," said Arpad Toth, GTSI Senior Technologist and Chairman of the InteGuard Alliance. "We see the addition of AXCESS' active RFID products as providing a variety of security applications which will enhance the physical security protection solutions we offer our government customers."

"AXCESS' partnership with GTSI facilitates the distribution of a critical technology, one that improves the security and efficiency of facilities throughout the government," commented Ben Donohue, Vice President of Business Development for AXCESS. "Becoming a member of this prestigious Alliance reflects our strong focus and commitment to increasing our System Integrator distribution channel, a key goal for AXCESS. This partnership also creates new exposure and sales opportunities for AXCESS, and is expected to have a meaningful impact towards the Company's overall long term growth."

AXCESS' ActiveTag™ RFID system uses small, battery powered "active" tags that when automatically activated transmit a wireless message typically 30 to 100 feet to palm size receivers. The receivers interface directly to the local TCP/IP (wired or wireless) network. As well as sensing, the tags are also used for a variety of security applications including automatic personnel access to facilities, automatic vehicle access to parking areas and yards, corporate asset tracking and protection.

### **About AXCESS Inc.**

AXCESS Inc. (OTCBB: AXSI), headquartered in greater Dallas, Texas, provides RFID (radio frequency identification) and video surveillance systems for physical security and supply chain efficiencies. The battery-powered (active) RFID tags locate, identify, track, monitor, count, and protect people, assets, inventory, and vehicles. AXCESS' Active RFID solutions are supported by its integrated network-based, streaming digital video (or IPTV) technology. Both patented technologies enable applications including: automatic "hands-free" personnel access control, automatic vehicle access control, automatic electronic asset

management, and network-based security surveillance. AXCESS is a partner company of Amphion Capital Partners LLC.

**About GTSI**
