AXCESS to Exhibit “Hands-free” Vehicle Access System at International Security Conference and Exposition

“Rolling Access” Enhances Security While Improving Convenience and Flow

DALLAS, April 5, 2005 – AXCESS International Inc. (OTCBB: AXSI.OB), a leading provider of Active Radio Frequency Identification (RFID) systems today announced it will demonstrate the ActiveTag RFID vehicle access control system at the International Security Conference and Exposition in Las Vegas. AXCESS will be exhibiting the unique “hands-free” system used for secure, rolling vehicle access control in booth #16109 for the duration of the show, April 6-8, 2005.

AXCESS’ Active RFID technology is currently used by numerous municipalities, fleet yards, government facilities and residential gated communities. The system features secure “rolling access” that automatically identifies and authenticates authorized vehicles. Hands-free, rolling access improves the convenience and traffic flow while reducing security personnel costs without compromising security. The solution is now available for automatic authorized access in commercial parking and fleet facilities as well as gated communities and country clubs.

AXCESS’ patented ActiveTag RFID product uses small, battery powered tags (generically called “active” tags) that when automatically activated, transmit a wireless message typically 30 to 100 feet to hidden palm size receivers. The receivers are connected via an industry standard interface to existing security alarm equipment or networked on the existing corporate network. Optionally, the tag system can also be used to trigger security video recording and live remote video transmission. The tags are used for a variety of security applications including automatic personnel access to facilities, automatic vehicle access to parking areas and yards, corporate asset tracking and protection, as well as special purpose sensing. Automatic email alerting and paging is offered for rapid response to security incidents.

About AXCESS International Inc.

AXCESS International Inc. (OTCBB:AXSI), headquartered in greater Dallas, TX, provides Active RFID (radio frequency identification) for physical security and supply chain efficiencies. The battery-powered (active) RFID tags locate, identify, track, monitor, count, and protect people, assets, inventory, and vehicles. AXCESS’ Active RFID solutions are supported by its integrated network-based, streaming digital video (or IPTV) technology. Both patented technologies enable applications including: automatic “hands-free” personnel access control, automatic vehicle access control, automatic electronic asset management, sensor management, and network-based security surveillance. AXCESS is a partner company of Amphion Capital Partners LLC.
