AXCESS and Dynasys Enter Strategic Partnership to Provide Active RFID Solutions to Barcode Integrators

Partnership Offers AXCESS' Active RFID Technology to Installed Base of Dynasys Customers

DALLAS, June 14, 2005 – AXCESS International Inc. (OTCBB: AXSI.OB), a leading provider of Active Radio Frequency Identification (RFID) systems today announced a strategic partnership with Dynasys Technologies, Inc, a leading technology consultant and distributor of automatic data collection and RFID hardware engineering solutions. This partnership will allow Dynasys to offer AXCESS' leading edge Active RFID solutions for long-range asset tracking, including its ActiveTag™ wireless tagging system to its base of existing customers, while serving as a value added integrator and distributor of AXCESS' products within the data collection space.

"The partnership with Dynasys holds significant potential for AXCESS, as enterprises are increasingly realizing the functionality and effectiveness that RFID allows in the data collection space." stated Ben Donohue, VP of Business Development for AXCESS. "We are excited to provide our active RFID solutions to Dynasys during this period of growth, and we believe this partnership complements Dynasys' existing product lines, while expanding AXCESS' reach into a new non-security focused sector."

Barcode integrators are an emerging, potentially significant market for RFID technology, as many integrators are now coming to understand the potential benefits that Active RFID has to offer. As RFID technology continues to establish itself within the [data collection] space, barcode suppliers are expected to accelerate their development of passive and active RFID solutions. With this partnership, AXCESS and Dynasys are now capable of effectively capitalizing upon this growing opportunity.

"Dynasys established its position as a leading automatic data collection specialist using traditional barcoding equipment," stated Bob Scher, CEO of Dynasys. "When we initiated our RFID offering, we quickly realized the need for both passive and active RFID solutions to ensure we could address the full range of our customer's business requirements. Our partnership with AXCESS allows us to build on our leadership position and ensures that we can continue to offer our customers the most advanced, proven Active RFID technology."

AXCESS' patented ActiveTag RFID product uses small, battery powered tags (generically called "active" tags) that when automatically activated, transmit a wireless message typically 30 to 100 feet to hidden palm size receivers. The receivers are connected via an industry standard interface to existing security alarm equipment or networked on the existing corporate network. Optionally, the tag system can also be used to trigger security video recording and live remote video transmission. The tags are used for a variety of security applications including automatic personnel access to facilities, automatic vehicle access to parking areas and yards, corporate asset tracking and protection, as well as special purpose sensing. Automatic email alerting and paging is offered for rapid response to security incidents.

About AXCESS International Inc.

AXCESS International Inc. (OTCBB: AXSI.OB), headquartered in greater Dallas, TX, provides Active RFID (radio frequency identification) for physical security and supply chain efficiencies. The battery-powered (active) RFID tags locate, identify, track, monitor, count, and protect people, assets, inventory, and vehicles. AXCESS' Active RFID solutions are supported by its integrated network-based, streaming digital video (or IPTV) technology. Both patented technologies enable applications including: automatic "hands-free" personnel access control, automatic vehicle access control, automatic electronic asset

###

management, sensor management, and network-based security surveillance. AXCESS is a portfolio company of Amphion Capital Partners LLC.

About Dynasys Technologies, Inc.

Dynasys has been a leader in the automatic data collection business since 1988 and has focused its efforts on RFID (Radio Frequency Identification) technology for the past 10 years. Since its inception, Dynasys remains a company run by engineers dedicated to solving its customer's data collection problems. Dynasys bills itself as the One-Source for RFID and the company is focused on making it easy for its customers to adopt RFID as a solution to their business problems. The company carries thousands of RFID devices in its inventory and also an in-house Design and Development Engineering Team that designs and manufactures special support hardware where customer-specific applications require it. Dynasys is value added integrator and distributor for AXCESS' Active RFID technology. For further information, visit www.rfidusa.com or call 1-800-867-5968
