PrismOne Selects Axxess International's Sensing for New Energy Usage Management Solution

Presence Tracking Key to Dynamic Building Environmental Systems Management

ORLANDO, Fla., Sept. 29, 2009 – [PrismOne Group, Inc.](#) (OTCBB:PMOZ), a provider of managed technology services to targeted vertical market clients with either a high number of employees, multi-locations or growth challenges, is pleased to announce that it has chosen [Axxess International Inc.](#) (OTCBB:AXSI), a leading provider of Dual-Active™ Radio Frequency Identification (RFID) and Real Time Location Systems (RTLS) solutions, as the supplier of RFID technology for PrismOne's pilot of the company's Presence Response and Intelligent Systems Management (PRISM).

PRISM will enable real time, dynamic analysis of a building environment through the use of Presence tracking to modify environmental systems. PRISM will manage and control use-sensitive systems such as lighting, HVAC and other systems to maximize energy efficiency and lower a user's and subsequently a building's carbon footprint. PRISM will be integrated into PrismOne's web-based interface as an additional module and integrated with the existing communications and network modules.

Samir Burshan, CEO of PrismOne, states, "I was educated as an architect and feel very strongly about building sustainability. In our capacity to develop technology solutions, I wanted to provide a way to answer the frustrating questions of why lights in an empty space are left on, or an AC is cranked down to 72 degrees or a TV or stereo is on when there is no one there - anywhere! RFID is just one component of PRISM but an important one. We didn't make this decision quickly. We wanted to find the right technology for our solution, and, after one year of searching, reviewing and re-reviewing our short list, we feel that Axxess is the best company to partner with to provide us that technology."

"Our MicroWireless technology automatically tells you where your personnel and assets are throughout a facility," said [Allan Griebenow](#), President and CEO of Axxess International Inc. "We are uniquely qualified for presence determination because our [wireless credentials](#) and asset tags are very small, economical and reliable compared to other options. Interacting dynamically with the building's energy management system will mean energy will be used most efficiently. With such a rapid increase in demand for green building solutions, we are very excited to support the PrismOne effort."

About PrismOne Group, Inc.

[PrismOne Group](#) is an established and rapidly expanding business based in Orlando, Florida. The Company provides managed technology services to targeted vertical market clients with either a high number of employees, multi-locations, or growth challenges. PrismOne solutions significantly minimize or remove their technology capital expenditure, driving savings to the bottom line while maximizing flexibility and efficiency. For more information on PrismOne Group, visit www.prismone.com.

About Axxess International, Inc.

Axxess International Inc. (OTCBB: AXSI) provides intelligent *Wireless Credentials* for business encompassing local location identification, tracking and control capabilities using its patented [MicroWireless™ technology](#) platform. The complete system solutions supersede existing manual personnel badges by automating various workforce management tasks that increase productivity, security, safety and business intelligence. Real-time data from labor activities also enables previously unattainable business intelligence and analytics initiatives. MicroWireless – based on active *RFID* principles – is the economic and technological sweet spot for autonomously-powered low cost, miniature, remote communication devices. Axxess is a portfolio company of [Amphion Innovations plc](#) (AIM: AMP). For more information on Axxess, visit www.axcessinc.com.
