For immediate release:

Access Int'l Chosen for Government IT Procurement Contracts by Victory Global *NASA's SEWP IV Contract Enables Agency-Wide Procurement of Access' Solutions*

DALLAS, TX, April 20, 2010 – [Access International Inc.](#) (OTCBB:AXSI), a leader in wireless credentials, and [Victory Global Solutions, Inc.](#), an experienced system engineering and integration firm, announce that Access International has been added to two popular federal government contracting vehicles: NASA's Solutions for Enterprise-Wide Procurement (SEWP) IV and 8(a) Small Business Administration (SBA). SEWP IV, whose period of performance is seven years with a \$5.6 billion contract limit, allows Federal agencies to buy a wide range of IT products without having to secure multiple quotes in an RFP procurement process. Access' popular automated applications such as IT asset protection, vehicle gate access control and emergency evacuation accounting have already been successfully implemented by numerous agencies including the Veteran's Administration, multiple branches of the U.S. Department of Defense and the Postal Service. Government customers can purchase Access' MicroWireless solutions through Victory Global quickly and easily because the contract has already been pre-competed.

Victory Global will demonstrate Access' [Dot MicroWireless™ Credentials](#) at the annual [SEWP Conference](#) on April 20 to 21 at the Walt Disney World Swan and Dolphin Resort in Lake Buena Vista, Florida. The conference will provide attendees (Government, Technical and Procurement Personnel; SEWP Contract Holders and SEWP Program Staff) with information and training on the SEWP IV contracts, available product solutions and planned initiatives for 2010.

"Inclusion on NASA's SEWP IV contract makes it significantly easier and faster for federal agencies to procure our MicroWireless solutions. We provide security and safety-related solutions, so they can now be in place as soon as possible to save money and lives," commented [Allan Griebenow](#), President and CEO of Access International. "We are pleased to be partnered with Victory Global, a knowledgeable systems integrator with solutions and installation experience with government agencies."

Access' Dot MicroWireless Credential provides local position determination, tracking, sensing and control capabilities, leveraging MicroWireless™ technologies to implement a unique Control Point Location System (CPLS) architecture. Applications include personnel access control, emergency evacuation, process automation, compliance reporting, productivity metering, asset protection via custodianship assignments, advanced workforce management, and contractor and visitor time and attendance. The Access RFID/CPLS systems offered through Victory Global consist of activators, receivers, tags, middleware and application software. Among other large government and military installations, Access' applications have included: tracking of laptops to prevent loss of assets in multi-floor facilities, vehicle identification with in-vehicle person count, personnel identification at barracks' entrances, identification of armament arsenal and tracking of classified documents with tag embedding

in binder spines. Axxess' solution has been implemented in military and civilian agencies to track and trace personnel and assets and affiliate people to items to protect and secure facilities and personnel.

After a formal evaluation process, NASA awarded 48 Indefinite Delivery Quantity (IDIQ) contracts to 38 prime Contract Holders, both Original Equipment Manufacturers (OEM) and Value Added Resellers (VARs). Victory Global, awarded in June of 2008, is one of 4(four) 8(a) contract holders, and Axxess was added on April 6, 2010.

Angela Brown, President and CEO of Victory Global Solutions, Inc., was recognized in 2009 by the editors of *CRN Magazine* as one of the top 100 Most Powerful Women of the Channel because of her commitment to Victory's government customers, involvement in high tech and eight-year participation in the promotion of women in the industry.

About Victory Global Solutions, Inc.

[Victory Global Solutions, Inc.](#) is a system engineering and integration firm that supports DoD, federal government and commercial clients. Founded in 2001, staffed with IT industry veterans and experienced with large scale deployment and logistics management of complex enterprise solutions, the company is committed to designing "best of breed" technology based solutions that create value in addressing current and future technology requirements. For more information, visit www.victorygs.com.

About Axxess International Inc.

Axxess International Inc. (OTCBB: AXSI) provides intelligent [Wireless Credentials](#) for business encompassing local location identification, sensing and control capabilities using its patented MicroWireless™ platform. The complete system solutions supersede existing manual personnel badges by automating various workforce management tasks that increase productivity, security, safety and business intelligence. MicroWireless – based on active RFID principles – is the economic and technological sweet spot for autonomously-powered low cost, miniature, remote communication devices around the local enterprise. Axxess is a portfolio company of [Amphion Innovations plc](#) (AIM: AMP). For more information on Axxess, visit www.axcessinc.com.
