

Personnel Tag

Description

The AT-132P Personnel Tag provides robust, convenient, hands-free identification of personnel for access control, people tracking and resource management applications. Tag signals can travel long distances around and through walls, clothing, luggage, even people. Multiple tags can be read at distances of up to 35 feet* inside a typical facility, thus allowing covert monitoring and an aesthetically pleasing installation.

The Personnel tag is fully potted and is thicker than Credential Tag to handle harsh environments. The card can be personalized by affixing an ISO7810 size PVC card or label into a recess in the tag case. A Personnel Beacon Tag is also available that automatically transmits on a preprogrammed timed interval to assist in the location and tracking of personnel across broad areas.

Features

Ruggedized – personnel tag has higher battery life and robust potted design to work in harsh environments.

Functional Linkage - personnel can be linked to one or more assets for maximum security with greater freedom of movement.

Hands-free Operation - convenient for granting access to doors, parking gates, clean rooms and other places where card swiping is cumbersome or impossible.

Omni-Directional - tags can be worn like a badge or carried in pockets, purses, briefcases, billfolds or other out-of-sight places in any orientation.

Beacon Option – automatic periodic transmit for locating personnel within broad areas.

Specifications Personnel Tag AT-132P	
Dimensions:	2.2" x 3.4" x 0.25"
Weight:	< 1 oz.
Operating Life:	1-3 years**
Operating Temperature:	-40° to + 185° F -40° to + 85° C
Operating Frequency:	Transmit: 315 MHz Receive: 126 kHz
Operating Range:	35 feet (tag to antenna)*
Environmental Protection	IP 68 - Potted
Options:	Beacon (AT-132P-B) Temperature (AT-132P-A) Beacon and Temperature (AT-132P-BA)

* Operating range depends on antenna selection, environmental factors and operational requirements. Range in excess of 50 feet is achievable with custom antenna designs. ** Operating life depends on beacon rate and duty cycle.
